

ADVANCED FIREFIGHTING

OVERVIEW

This 4 day course is part of the training exercises for Deck and Engineering Officers who wish to succeed and complete a Certificate of Competency and crew who are nominated to control firefighting procedures.

All aspects of firefighting measures at sea and in port will be covered on this course, with specific importance on organisation, strategies and current command including relationship with shore-based firefighters. The course will cover issues such as aeration control, hazards involving dangerous goods and the effects of firefighting water on ship stability. Students are evaluated on their aptitude to successfully control firefighting processes. An assortment of practical exercises involving fighting fires of different types and intensity are included.

ENTRY REQUIREMENTS

Learners who are undertaking this training:-

Must be aged 17 or over
