

BASIC TRAINING FOR SERVICE ON SHIPS OPERATING IN POLAR WATERS (MCA APPROVED)

OVERVIEW

To give seafarers on board ships operating in polar waters, in conjunction with the guidance provided in the Polar Code, the education and training covered within the STCW requirements.

During the course the learner will know

- about ice found in polar waters

- about the polar water regions where ice is found and related seasonal changes and understand about vessel preparedness, performance and capability in polar water regions

- and understand emergency preparedness and response to emergencies in polar waters

- how to ensure compliance with pollution prevention requirements and how to prevent environmental hazards

- and understand how to use international and regional regulations and codes whilst operating in polar water.

Contribute to the safe operation of vessels operating in polar waters.

Monitor and ensure compliance with legislative requirements.

Apply safe working practices, respond to emergencies.

Ensure compliance with pollution prevention requirements and prevent environmental hazards.
