

VIDEOTEL - BASIC GAS TANKER TRAINING COURSE (MCA APPROVED)

OVERVIEW

This course is delivered using Videotel computer based self-study with comprehensive on screen instructions and assessments. It is estimated that you will require 20 hours to complete the study.

This includes the time needed to follow the program on the computer plus the additional reading, research and the time needed to complete the computer based assessments and written projects.

The candidate will have gained sufficient knowledge of the practical application of the basic principles of Gas tanker operations.

Syllabus:

- Module 1 - Introduction
- Module 2 - The Physics of Liquefied Gas
- Module 3 - Hazards and their Management
- Module 4 - Ship Design and Equipment
- Module 5 - The Cargo Operational System
- Module 6 - Gas Detection
- Module 7 - Safety and Pollution Prevention
- Module 8 - Cargo Firefighting
- Module 9 - Emergency Procedures

ENTRY REQUIREMENTS

Candidates must hold a firefighting certificate addressing the tanker firefighting competencies specified in STCW A-V/1-2-1.

For an MCA endorsed course certificate, candidates must hold an MCA approved tanker firefighting certificate.

ASSESSMENT

A portfolio of written assessments, completed at the end of each module, will be submitted to Videotel by the candidate on completion of the course. Successful completion will lead to the issue of an MCA approved certificate by Videotel. On successful completion of the course, the candidate will have the
